

# Memory Care

ComfortCare Homes of Wichita, KS provides exceptional Alzheimer's disease and memory care in a residential small-group setting.

We advocate for Residents doing as much for themselves as they can, but we're always there to help a Resident with his or her individual needs.

## TRADITIONAL MEMORY CARE

### Real Home Environment

For Residents who require assistance with most daily living activities

## ADVANCED MEMORY CARE

### High Level Care

For Residents with advanced physical and cognitive needs. Best Choice for families who don't want nursing home placement.

## SHORT-TERM CARE

### Transition Care

For Residents on Hospice, Home Health, or transitioning from hospital or nursing facility

Not "home-like" but a real home

Higher Staff to Resident Ratio

Our Residents are like our family

## What We Do: ComfortCare Homes

While typical assisted living facilities may promote themselves as being "home-like", we will care for your loved one with Alzheimer's disease, dementia, or other memory impairments in an actual home.

In fact, a ComfortCare Home looks just like any other house on the street. There are no signs outside the spacious, attractive ranch-style Homes. Inside, you'll find a warm, inviting residence rather than a maze of long, impersonal halls and identical rooms.

Each ComfortCare Home has a dedicated Care Team, consisting of a well-trained and compassionate staff of CareGivers. This means your loved one will become familiar with their CareGivers and foster close bonds, rather than being cared for by a staff that changes every few hours.

## Expectations for Realistic Results

The life enrichment program at ComfortCare Homes of Wichita, KS includes sensory activities that are all about connecting Residents with memories and positive feelings through the senses of touch, taste, hearing and even smell.

We provide daily socialization and physical activity without making Residents feel overstimulated.

We don't charge extra for having a certain room location or administering medication. Because of the nature of memory-impairing diseases, many of our Residents are already on medication when they arrive, and incontinence needs are common and can even fluctuate.

That's why these services are included for all Residents, at no additional charge.
